
How to put the Home Trust Secured Visa Card Information Page & Application Link onto your website

STEP 1:

Email your website address and page url where the Information & Application Link will be hosted to marketing@hometrusted.ca

We need your website address and url to activate the Application Link from your site and ensure your referral code is captured for any applications from your site. Without that code, you will not be paid your referral fee for approved applications.

Once we activate your Application Link, we will send you an email confirmation and will provide you with the “**Home Trust Secured Visa – Broker Website Package**”. It is a zip file that includes all the html files you need to upload the new content and link to your website.

STEP 2:

Ensure your website address and design are compliant with the terms of your Referral Service Agreement.

Based on the terms of your Referral Service Agreement regarding Proprietary Rights and Licenses (Section C), you must clearly identify your website separate and distinct from Home Trust by complying with the following conditions:

- 1. Your main website address cannot include any of the words ‘Home Trust Secured Visa’**
 - We will confirm your website address is compliant with our approval in Step 1.

- 2. Customers must clearly be able to identify your site as independent from Home Trust**
 - You must, at a minimum, add a banner to the top of the web page with our Secured Visa content to identify yourself as an independent referral source.

Failure to comply with these terms could result in the termination of your Agreement.

If you don't have a web developer resource, you can follow these steps to add a banner to the top of the Secured Visa page:

1. Make sure you have an image of your company logo with the extension [.gif](#). Rename the logo to "[mycompanylogo.gif](#)" and place this logo inside the "**images, pages, apps**" folder. (Choose [yes](#) if it ask to replace the existing image)

2. If you want to resize your logo, right click the file named “**index.html**” in the “**images, pages, apps**” folder and open it with either your usual html editor, **or** with Notepad if you are using a Windows platform, **or** Simple Text if you are on a Mac platform.

Find this line and change your preferred width and height.

```
<!-- *** TO RESIZE YOUR LOGO, JUST CHANGE THE WIDTH AND HEIGHT" -->  

```

2. Save the file by going to file->save.

STEP 3:

Upload the Home Trust Secured *Visa* Card Information Page & Application Link onto your website

- Create a *new folder* called “**hometrustedvisa**” in the root directory of your web server
- Put the *entire contents* of the “**images, pages, apps**” folder from the “Home Trust Secured *Visa* – Broker Website Package” into the new folder. Make sure you do not overwrite any existing files on your server.

You should now have a new **folder** called **hometrustedvisa** in the root directory of your web server containing all the files for the Home Trust Secured *Visa* Card web content. Users will be able to access this page by going to:

<http://www.NAMEOFYOURWEBSITE.COM/hometrustedvisa>

STEP 4:

Email marketing@hometrusted.ca once the new content is uploaded to your site.

We will test your link to our application and confirm that your referral number will be captured for your applications.

If you have any further questions, please contact marketing@hometrusted.ca
